SUMMARY

Results driven Software Engineer with hands-on experience in mobile application development, backend integration, and scalable software solutions. Skilled in Flutter, Dart, Node.js, Express.js, MongoDB, REST API integration, and responsive UI development. Passionate about building high performance applications, solving complex technical problems, and developing AI-powered solutions with clean and maintainable code

TECHNICAL SKILLS

- Java
- Python
- Dart
- PHP
- Flutter
- Node.js, Express.js
- TensorFlow
- Rest APIs
- Flask
- MySQL, MongoDB
- React.js
- HTML
- CSS, Tailwind CSS
- Git
- GitHub
- Swagger
- Postman

EXPERIENCE

Software Engineer Intern : Mobile flutter Developer

Nimbus venture, No 07, 8th Lane, Nawala Road

Aug 2025 – Feb 2026

- Developed and enhanced Flutter mobile applications by implementing responsive UI components, improving user experience, and optimizing application performance.
- Integrated REST APIs with backend services, implemented form validation, CRUD operations, pagination, search/filtering, and efficient data handling.
- Collaborated with cross-functional teams to test APIs using Swagger, validate data, resolve critical bugs, and ensure stable releases in development and QA environments.
- Contributed to multiple production projects, including transportation and operator management applications, delivering scalable features and maintaining high code quality.

PROJECTS

Skin Cancer Detector AI App(Deep Learning)

- Develop an AI powered mobile application for skin lesion analysis and skin cancer risk prediction
- Built and trained a CNN using TensorFlow and Keres for image classification
- Integrated the AI model with a Flask REST API to provide real time predictions to the mobile application
- Designed a Flutter based user interface for capturing or uploading skin lesion image and displaying prediction results with confidence levels

- Implemented image quality validation and multi angle image analysis to improve prediction reliability and support early skin cancer screening

E-Tuition Mobile Application

- Develop a cross platform tuition management mobile application using Flutter and Node.js
- Implemented role based access for students, teachers and administrators
- Built features including attendance tracking, assignments management, academic video support and AI chatbot integration
- Designed and integrated RESTful APIs to enable secure communication between the mobile application and backend
- Gained hands on experience in full-stack mobile application development, backend integration and user authentication

EDUCATION

SLIATE – Higher National Diploma in Information Technology
(HNDIT)

CERTIFICATIONS

Certified Machine Learning Engineer (CMLE) Level 1

Certified Machine Learning Engineer (CMLE) Level 2

Build Apps with Flutter - Google Developer Badge
